## L'azienda

**@italy**® è un brand tutto italiano di componenti per l'automazione.

### La filosofia

Il nostro team ha esperienza e conoscenza del territorio italiano, delle diverse tipologie di industrie che lo compongono e delle loro esigenze, ne siamo parte da oltre 20 anni. Abbiamo costruito, insieme ai nostri clienti, la nostra e la loro storia, successi e sventure, che ci hanno fatto crescere e ampliare i nostri obiettivi. Il nostro prodotto è sempre stato prima di tutto da noi esplorato e analizzato, affinchè possa essere affidabile nel tempo e innovativo nel suo genere, ed infine applicato su macchine ed impianti, con soddisfazione e riconoscimento reciproco.

### Il prodotto

**@coder**® è il nostro logo per identificare gli encoder, incrementali-assoluti-magnetici, gli encoder che ormai sono parte integrante di macchine-impianti o parti essi stessi di altri apparecchi quali motori, brushless-asincroni-sincroni ecc. Un oggetto sul quale risulta difficile pensare ci possa essere innovazione eppure anche qui ci può essere studio e progetto che fa nascere nuova tecnologia e quindi nuovo prodotto.

Un esempio sono i nostri **@coder**® incrementali a tecnologia riflessiva, adottano un nuovo componente elettronico che permette di essere più flessibili, precisi, versatili e rapidi nella produzione. I nostri accorgimenti produttivi che unificano il più possibile le versioni incrementali ed assolute per poter avere un tempo di consegna rapido in linea con le richieste del mercato.

Prodotti che possano essere sostituti del passato, adatti al presente ed innovativi per il futuro che ormai è già domani, sapendo mantenere gli standard di qualità più severi che sempre più si chiedono al mondo dell'elettronica.

## The Company

**@italy**® is an Italian brand that includes components for industrial automation.

### Our philosophy

For more than 20 years our team has developed a deep knowledge of the Italian territory and of all the different manufacturing Companies that work in it, with all their exigencies. We have created our story and that of our Customers thanks to a close cooperation with them, also made of success and sacrifice that have allowed us to grow and extend our goals.

First of all, we have always tested and carefully studied our products, so to be long-term reliable and innovative. Then we have installed our items onto machines and plants, with huge satisfaction and mutual gratitude.

### The product

**@coder**® is our logo to identify incremental – absolute – magnetic encoders, devices that are integral part of machines and plants, and components of brushless – asynchronous- synchronous motors, and so on. It might seem difficult to think that it is still possible to innovate encoders, nevertheless we keep finding new projects and developments that allow the birth of new technology and therefore new products.

For example, our incremental **@coder**® with reflective technology adopt a new electronic component that allows them to be more flexible, precise, versatile devices, with rapid production process. In order to meet with the market requests, our delivery times have been shortened thanks to production strategies that unify incremental and absolute versions as much as possible.

These are products that can replace those ones installed in the past, that are suitable for the present and are innovative for a future that is already tomorrow, but complying with the most severe quality standards, more and more required in the electronic world.

- Uscita: Line Drive, Push-Pull, NPN
- Output: Line Driver, Push-Pull, NPN
- Alimentazione da 5 a 28 V DC
- Power supply from 5 to 28 V DC
- Albero in Acciaio INOX
- INOX shaft
- Custodia in Metallo
- Metal case

- Risoluzioni standard fino a 2048 ppr
- Standard resolution up to 2048 ppr
- Frequenza operativa fino a 220 K Hz
- Max frequency up to 220 K Hz
- Velocità di rotazione fino a 3000 rpm
- Maximum Speed up to 3000 rpm
- Grado di protezione fino a IP54
- Enclosure rating up to IP54

**P8 015** - Standard 8 PIN cable L 1,5 mt  
J10 - Connector J10  
M12 - Connector M12, 8 pin  
M10 - Military connector M10

**S** - Standard enclosure rating IP54  
P - Enclosure rating IP66

Special Product code

XXXXXX - Resolution: Pulse per Revolution

- Elevata rigidità torsionale
- Torsional rigidity
- Compensazione del disallineamento assiale
- Ability to compensate axial misalignments
- Assorbimento piccoli scostamenti assiali
- Ability to absorb small axial shifts of the shaft
- Corpo in alluminio Alluminio UNI 9002/5
- Body in Aluminium UNI 9002/5
